1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Takeuchi (US Patent No. 6,141,061).

As to claim 4, Takeuchi teaches an image data enlarging apparatus enlarging image data stored in a first storage unit to write to a second storage unit, comprising: a determining unit determining whether the image data stored in said first storage unit corresponds to a prescribed line (figure 9a); a reading unit sequentially reading the image data stored in said first storage unit line by line and, when said determining unit determines that the image data corresponds to the prescribed line, reading the image data of the relevant prescribed line a plurality of times (column 13, lines 22-29); and a writing unit writing the image data read by said reading unit to said second storage unit (figure 9b).

As to claim 5, Takeuchi teaches an image data reducing apparatus reducing image data stored in a first storage unit to write to a second storage unit, comprising: a determining unit determining whether the image data stored in said first storage unit corresponds to a prescribed line (figure 4a); a reading unit sequentially reading the image data stored in said first storage unit line by line and, when said determining unit determines that the image data corresponds to the prescribed line, refraining from reading the image data of the relevant prescribed line (column 8, lines 58-65); and a

writing unit writing the image data read by said reading unit to said second storage unit (figure 4b).

2. The following is an examiner's statement of reasons for allowance: prior art fails to teach or suggest an image data enlarging/reducing apparatus enlarging or reducing image data stored in a first storage unit to transfer to a second storage unit, comprising a counting unit counting a line number of the image data stored in said first storage unit, a setting unit where an offset address is set, a transfer source address generating unit sequentially incrementing transfer source addresses and, when the line number counted by said counting unit corresponds to a prescribed line number, adding the offset address set in said setting unit to respective said transfer source addresses to output as addresses to said first storage unit, a transfer destination address generating unit sequentially incrementing transfer destination addresses to output as addresses to said second storage unit, and a control unit controlling direct memory access transfer from said first storage unit to said second storage unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-3 are allowed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Endo et al and Amemiya et al are also cited.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yon Couso whose telephone number is (571) 272-7448. The examiner can normally be reached on Monday through Friday from 8:30 to 5:00.
